- A compact, table top design that is much easier to use and to handle than large crimping machines.
- Will crimp pumps from 13mm to 20mm.
- Execution of bottle crimping is fast and simple making the tool ideal for small-scale production or lab use.
- A high-quality, multi-tooth crimp with a tight crimp seal every time, ensuring that crimps are long-lasting and reliable.
- The crimp tool allows crimping with the perfume bottle pump actuator (push-button) in place, simplifying the crimping process since there is no need to remove and replace it.
- A height adjustment allowing the crimp to be used with multiple bottles and pump sizes.
- Incredibly strong body composed of anodised aluminium and electroplated steel parts, making it extremely corrosion and wear resistant.
- Top-quality internal wear parts that are hardened to extend the life of the bottle crimp tool.

This is the only tool to have proper interchangeable multi- tooth collets, similar to those used on larger machines, yet is light and easy to use. Tools from other manufacturers are made to crimp one size only and rely on only four jaws or a small coil spring to do the crimping.
