Year : NEW

STANDARD MACHINE SPECIFICATIONS (All details are for guidance only, and subject to confirmation)

Direction: N/A

Services req: 240v, single phase, 50Hz - 2 pin EU plug as standard on all Enolmatic filling machines

Through vacuum operated filling, the product is bottled in a most natural way, allowing to maintain its original quality and features. When placing the bottle under the machine, the fluid is sucked by the vacuum created inside it, without any contact between product and pumps or mechanical components. The filling level is adjustable: once selected, it automatically fills up the bottle to the desired level. Simple to use and clean, a great advantage especially when bottling oils. Semi-automatic, Fully adjustable fill heights, Easy strip down for cleaning, Bench / table clamp, Built in vacuum pump.

Basic machine without nozzle
7.5mm diameter miniature nozzle in plastic
7.5mm diameter miniature nozzle in stainless steel
16mm diameter nozzle in plastic
16mm diameter nozzle in stainless steel
